Projects

Voice Controlled Flashcards | voci.ca | [GitHub](#)

- Designed and implemented the project, including the database model, frontend design, controllers, and other features
- Used Laravel, PHP, HTML, and Tailwind, with some additional JavaScript
- A group of students now use it to improve academic performance

Finance Projection | [Download on my site](#) | [GitHub](#)

- Implemented the project with a MVC design and object oriented practices
- Used Java with the Java Swing library to develop the methods and interface
- Myself, my family, and friends use it to estimate the effects of long term budgets
